

NYS CTE Virtual Collaboration: Challenges and Innovations

June 22, 2021

As COVID-19 moves into a new phase, CTE educators are considering how lessons learned from this past year can support teaching and learning going forward. New York State's students need opportunities that are more equitable, flexible, and diverse in their delivery and more focused on competencies.

The CTE TAC Sharing and Support event will help educators meet the anticipated surge in demand for CTE programs that will provide youth and adults with the skills and credentials needed in the post-pandemic workforce. By collaborating with peers, CTE educators and administrators will network within their respective CTE content areas to share experiences, resources, and ideas, while forecasting the future and enhancing their practice.

CTLE credit is available for attending!
PRE-REGISTRATION IS REQUIRED
